CaféBank

Café Bank 3-1 Exclusive VIP Blend Coffee

Coffee containing
3 kinds of "medical herbs"

Tongkat Ali Maca Guarana

Three kinds of herbs that have been handed down since ancient times as medical herbs. It contains liquid extracted by a unique method.

Tongkat Ali

Maca

guaraná

Café Bank is a registered trademark of Global Eyes Corporation, a trading company specializing in coffee beans and coffee roasting machines in Taiwan. Since its commercialization in 2017, more than 1 million sachets have been sold worldwide.

■ Tongkat Ali (Malaysia Ginseng)

A shrub of the family Lycaenaceae, native to Malaysia and self-growing in the rainforests of Southeast Asia. In Southeast Asia, it has long been regarded as a natural herb with no side effects, and is a useful material for men and women of all ages. The Malaysia government enacted laws to protect this precious natural resource as a national intellectual property right.

■ Maca

A perennial plant of the cruciferous family that grows in Peru, South America. Valued by the privileged class since the Inca Empire, maca has been raised by absorbing all the nutrients of the soil in a harsh natural environment, and contains various types of amino acids and other rich nutritional components, which makes it a superfood.

■ Guarana

A climbing plant of the genus Guarana of the family Mucroziaceae, native to the Amazon River basin. The seeds contain about three times more caffeine and abundant tannins than coffee, and have been called the "elixir of the Amazon" because of the legend that indigenous peoples such as the "Guarani people" who drank guarana and danced at the festival for three days and three nights.
